## About Me

I enjoying challenge and engaging with projects that require me to learn more and to become powerful in development techniques A few I would like to highlight that would enable me to contribute are:

- Highly skilled in designing, testing, and developing software
- Knowledgeable of front-end development best practices
- Hands-on software troubleshooting experience

I'm full-stack developer and can design and run projects with Javascript frameworks from scratch, but due to my mastery of VueJS/Nuxt and React/Next, I prefer to work only on the front-end.
